Instructions for the program of CEORL Brussels 2019

You are hereby invited to propose topics for the Round Table (RT), the Instructional Course (IC) and the Keynote Lecture (KL). The different session type slots for your suggestions can be found in the various tabs of the attached Excel sheet. When filling in topics please keep the following in mind:

- Instructional courses should have 2 tutors/speakers

- Please do not communicate with speakers, as this program is a proposal, which may be amended at the finalization meeting in June 2018.

- For the RT sessions please suggest a moderator as well as several speakers. Moderators of the sessions will be offered some freedom to adapt the sessions and speakers.

- We encourage you to replace one or two of the traditional sessions formats (RT/IS/KL) with a new session type in the categories:

  o **Battle/debate session:** Discussion of one topic with two opinions but there is no voting on which approach is better.

  o **Nightmare session**: Presentation of the worst case study. The goal is to learn from mistakes. Cases may not be judged, and it should be a neutral presentation. The focus is on very practical topics.

  o **Video Session:** A session where videos are being presented.
